RUSHING WORK ON FAIR GROUNDS

Busy Scene Presented by Efforts to Prepare October Exposition.

GREAT EXHIBIT BUILDING

Liberal Prizes Bring Promise of Increased Entries in Every Section.

The grounds of the Virginia State Fair present the appearance of a hive of industry. Workmen are to be seen on every hand making preparations for what promises to be the largest fair ever held in the Old Dominion. For while the fair does not take place untill "the first week in October"—3d to 8th, inclusive—the labor of preparing accommodations for the thousands of head of live stock, as well as exhibits of the farms, gardens and orchards of Virginia, is in itself a task requiring weeks and months of incessant toil and labor.

Several small buildings have been erected to care for additional exhibits in the live stock departments, the number of entrees in which promises from present indications, to be double that of last year. The most striking addition to the grounds, however, is the Industrial Hall, the 280x260 feet, steel, brick and cement structure now in course of erection, to care for the exhibits made by merchants and manufacturers.

The building occupies a central location across the race-track, opposite the grandstand, and the dome, sixty feet above the concrete foor, is plainly visible for more than a mile on every side. In Keeping with the idea that the structure at other times than during the fair would be used to accommodate conventions and other large gathering, the centre span has gwidth of 112 feet by 230 feet in the clear.

Wote Bonds.

Burial associations in Virginia, of which quite a number exist for the purpose of furnishing funchals in return for a fixed payment, will bereafter be amenable to the insurance laws of the State. They have been officially defined as insurance companies.

These organizations collect from their members a certain stipulated sum, payable weekly or monthly. In return they agree, in the event of the death of a member, to bury him, the funeral to be of a certain fixed value. After considering the matter, Commissioner Joseph Button has decided that these associations are insurance companies, and must come under the supervision of the Burcau of Insurance Ho is sustained by an opinion rendered by Attorney-General Samuel W. Williams, and the ruling is now in effect and will be unless there is a successful effort to overthrow it in the courts. All such organizations must pay all the licenses required of insurance companies, and must deposit bonds with the State Treasurer to cover possible contingencies and to protect those who are practically its policy-holders.

Aids Nature

The great success of Dr. Pierce's Golden Medical Discovery in curing weak stomachs, wasted bodies, weak lungs, and obstinate and lingering coughs, is based on the recognition of the fundamental truth that "Golden Medical Discovery" supplies Nature with body-building, tissue-repairing, muscle-making materials, in condensed and concentrated form. With this help Nature supplies the necessary strength to the stomach to digest food, build up the body and thereby throw off lingering obstinate coughs. The "Discovery" re-establishes the digestive and nutritive organs in sound health, purifies and enriches the blood, and nourishes the nerves—in short establishes sound vigorous health.

If your dealer offers something "just as good," it is probably better FOR Him...it pays better. But you are thinking of the euro not the profit, so there's nothing "just as good" for you. Say so.
